

HAZARD COMMUNICATION MEETING OUTLINE

1. Training Points

A. Introduction

- Many chemicals are hazardous to your health
- You have a right to know about hazards you face on the job and how to protect yourself

B. Identifying Hazards

- Assume a chemical is hazardous unless you know otherwise
- Read container labels and MSDSs

C. Protection Against Hazards

- Check the physical hazards
- Use PPE
- Check the handling and storage instructions
- Follow recommended hygiene practices
- Know proper emergency procedures

D. Safety Procedures

- Follow manufacturer's instructions
- Follow company procedures—no shortcuts

2. Practical Exercises and Discussion Points

3. Wrap-Up
